

REACH – Information

in accordance with Regulation No. 1907/2006/EC
for Registration, Evaluation, Authorisation and
Restriction of Chemicals (REACH)

The producer/supplier

Interroll Trommelmotoren GmbH
Opelstrasse 3, 41836 Hückelhoven, Germany

hereby declares that we comply with all obligations under the REACH Regulation, including all information obligations in the supply chain and provide the necessary materials.

Information obligations under Article 33.1. REACH

As a supplier of articles, we are obliged to provide information if a so-called candidate substance (substance of very high concern (svhc)) is present in a concentration of more than 0,1 % by mass in our article or in an article used in our article.

We are in constant dialogue and exchange of information with our suppliers, especially when expanding the candidate list, and take into account the interpretation of the ECJ judgment C-106/14 with regard to the reference value of 0,1%: ECJ 106-14.

In June 2018.

Lead metal (CAS No. 7439-92-1) is included in the REACH candidate list.

The inclusion in the candidate list is not based on new scientific knowledge but serves to collect further information on lead, e.g. on the amount of metal used in the EU.

Lead is still an important element for various alloys. It is not without reason that the lead content for steel, aluminium or copper alloys is permitted in the RoHS Directives 2011/65/EU and 2015/863/EU in various exceptions up to 4%.

We are nevertheless obliged to pass on to our customers the information available to us on the use of lead >0.1% in some copper and aluminium parts in some of our products.

Products subject to this information obligation are listed in the annexed list.

A handwritten signature in blue ink, appearing to read 'H. Tiedemann', written over a horizontal line.

Dr. Hauke Tiedemann

Managing Director Interroll Trommelmotoren GmbH
Hückelhoven, 01.05.2019

The following Interroll products are subject to the duty of information due to the use of lead >0.1% in the aluminium parts and copper alloys:

- I-Motor
- S-Motor
- D-Motor
- DM-Motor
- PD-Pallet Drive
